Volume 1, Issue 4

A Word from Kim

It's hard to believe that June is here already! May has come and gone in a blink of an eye! Pretty soon the kids will be finished school and home for the summer holidays. It's a very busy and exciting time for families. We thought that you would like to know that our clinic will be closed for summer holidays the week of July 20th as well as the week of August 17th.

I would also like to share some exciting news with you! Effective July 1st, I will be the new president of the Collingwood Kinettes. I have just been awarded my 15 year pin for volunteer service in the community and I am really looking forward to this new and exciting challenge. The Kinettes have an upcoming project on June 30th. We will be having a charity yard sale at my house and the proceeds will be donated to the Cystic Fibrosis Foundation. If you have any items that you would like to donate for this event, please call our office directly for further information at 705-445-0011.

Also, I would like to remind you that if you would like to participate in our newsletters, we would love to hear from you. It could be your favourite recipe or perhaps denture related. If there are any specific topics that you would like to learn more about, we encourage you to let us know.

I look forward to seeing you in the near future.

Kim

Kim Dadswell, Denturist

Fit, Form & Function

The fundamentals of a great denture are Fit, Form and Function, each element working harmoniously to achieve the look, feel and functionality you require from your dentures.

Dentures work with you to ensure that your new dentures feel good, look good and perform well, while you are living life to the fullest.

FIT: Do your dentures fit? Do your dentures feel loose? Do your gums hurt? We will help you find the solution for the best fit possible: relines, precision dentures or implant-retained dentures may be the answer for you.

FORM: How do your dentures look? Do they reflect the natural, attractive smile you want? Do you like the way your teeth look? Let us work with you to find the right look and feel. Professional cleaning, repairs or new dentures can give you the appearance you've been looking for.

FUNCTION: How well do your dentures work? Do you have difficulty chewing? Do you avoid certain foods? We will recommend a solution that best meets your needs. A minor adjustment could make a world of difference in how your denture performs.

Denturists are trained in all aspects of denture fitting and fabrication, from taking impressions to personally creating dentures. This way patients can enjoy personalized and cost-effective service. Denturists provide a professional relationship that starts with a handshake and culminates in a beautiful smile.

Newsletter Spotlight

We have a full service denture lab on the premises which is cost effective for our patients.

If you like our service tell someone. If you don't, then tell us.

Call our office to schedule an appointment that is convenient for you.

Our practice continues to grow by referrals from our patients.

Thank you recommending us.

"You can trust us with your looks, your smile and your image."

Denture Care Tips

Did you know that when dentures aren't in your mouth that they should be kept moist? This prevents them from drying out and becoming brittle and losing their shape. Keep in mind that if you have a back up set then put them in a baggie with a little water and freeze them. That way you don't have to worry about the water drying up.
