

April showers bring May flowers! It is so exciting to finally see the beautiful weather here! I would like to take this opportunity to welcome home our snowbirds! While you were away, we have been busy at the clinic. We have been updating and upgrading our techniques, material and equipment to ensure better, quicker and easier procedures for our patients and ourselves. We aim to give our patients the best service and dentures that we can provide!

If you have missing, broken or loose teeth, wearing dentures that are over 5 years old, having difficulty chewing or if oral discomfort makes it difficult to wear dentures, take a little time to consult with us. You can trust us with your smile, your looks and your image.

We are committed to providing outstanding service and individual, personalized patient care. If you like our service, tell someone. If you don't, tell us!

Call us for a complimentary, no obligation consultation and written estimate.

I look forward to seeing you in the near future.

Kim

What Services Do We Offer?

Dadswell Denture Clinic has a full service denture lab on the premises, which is cost effective for our patients. We offer a wide range of services and believe that every individual requires a specific treatment based on their needs. We use only premium quality materials and follow our provincial fee guide as set by the Denturist Association of Ontario.

Services provided:

- oral examinations and consultation
- full dentures
- partial dentures (to replace one or more, but not all teeth)
- flexible partials (invisible clasps for metal free smiles)
- immediate dentures (a denture made prior to tooth extraction and placed immediately after teeth are pulled)
- implant retained and supported dentures
- repair of broken dentures (same day)
- relines (same day)
- rebasing of loose dentures
- soft liners
- mouth guards
- tooth whitening

Denture Care Tips

Did you know that plaque and tartar can build up on your false teeth, just as they do on your natural teeth? To prevent this, daily cleaning of your dentures is recommended especially after eating meals.
