

A WORD FROM KIM

It's hard to believe that June is here already and in a couple of weeks it will be summer! This is so exciting to me! The rain can stop anytime now as I am anxiously waiting for the warmer weather to arrive! I would like to thank everyone that sponsored me for, The Carstar Walk to Make Cystic Fibrosis History. As you know it was originally scheduled to take place at the Toronto Metro Zoo, but with the strike it was moved to Canada's Wonderland. The weather was good and it was such a beautiful day! My daughter, Rowan and I had a wonderful day representing the Kinette Club of Collingwood.

I would just like to let everyone know that the clinic will be closed for the day on June 7th and 22nd for holidays. We will also be closed on June 15th for a Denture Conference, called Perfecting Your Practice. This is a wonderful way for all of the Denturists across Canada to learn valuable information about our profession as well as to reconnect with each other.

My staff and I take pride in providing the best possible denture care to you, to ensure that you have top notch oral health. We offer a wide variety of services with having a full service denture lab on the premises. Thank you for your continued support and we look forward to seeing you soon!

Happy Father's Day!

All The Best,
Kim

THE IMPORTANCE OF AN ANNUAL EXAM

Your dentures are important to the way you look and feel. That's why it's important to maintain your dentures and ensure that they perform at their optimum. A regular check-up with your Denturist is the most effective way for you and your dentures to get the care and attention that you both deserve.

Over time, your mouth goes through considerable changes. Tissue shrinkage and loss of underlying bone (resorption) on which your dentures rest, will occur. Since your dentures do not change, they may no longer fit like they once did. This is what you can expect during your visit.

- update your dental and medical history
- intra-oral examination
- check the integrity of your denture
- check the esthetics, stability and the bite
- discuss options available to you based on your needs
- review of oral hygiene procedures and denture care
- cleaning and polishing of your dentures

An oral exam will help detect oral cancer or other abnormal conditions using the Velscope Intraoral Scanner. Worn out dentures can cause an improper fit and bite which can also affect your ability to speak and chew, as well as your appearance. We will also check for cracks, chips, scratches and worn or loose teeth. Call to book your appointment today, if your last visit was more than one year ago.

RECIPE

HOMEMADE BARBECUE SAUCE

1 1/2 cups Ketchup
1/2 cup packed Dark Brown Sugar
1 1/2 tsp Paprika
3 tbsp Cider Vinegar
1 1/2 tbsp. Worcestershire

3 medium Garlic Cloves finely chopped
3/4 tsp freshly Ground Black Pepper
1/4 tsp Celery Salt
1/2 cup Water

Combine all ingredients in a small saucepan over medium heat. Bring to a boil, stirring until all ingredients are combined. Reduce heat to low and gently simmer until sauce has thickened. Will take approximately 30-40 minutes. Remove from heat and let cool to room temperature. If not using right away, cover and refrigerate. Will stay fresh for up to two weeks. This homemade barbecue sauce is fabulous on everything! Enjoy!

Kim Dadswell, Denturist

We have a full service denture lab on the premises which is cost effective for our patients.

If you like our service, "please tell someone". If you don't, then "please tell us."

Call our office to schedule an appointment that is convenient for you.

Our practice continues to grow by referrals from our patients.

FUN CORNER

HAPPY FATHER'S DAY!

Fantastic in every way!

Always there for me!

Teaching me right from wrong!

Hero to our family!

Everyone can count on him!

Really the greatest dad ever!

"We Love To Make You Smile"
